

Important Printing & Assembly Tips

- **Print Settings:** Please select "Actual Size" (100% Scale) in your printer settings before printing. Do not choose "Scale to Fit", or the pieces won't align perfectly.
- **Paper Quality:** For a sturdy and premium toy, we highly recommend printing on 200 gsm cardstock (thick paper).
- **How to Play:** Carefully cut along the solid lines, fold along the dashed lines, glue the tabs (a glue stick works best!), and start playing!

How to do it?

- **Step 1:** Cut out all the pieces carefully.
- **Step 2:** Fold along the dashed lines to crease the edges.
- **Step 3:** Apply glue to the white tabs and connect them to form the doghouse.

Solid Line: Cut

Dashed Line: Fold

Corner Areas: Glue here
